

Chemical Warfare on Americans

CHEMTRAILS

REVEALING: **U.N. PROJECT CLOVERLEAF** REDUCTION TARGET: HUMANITY

Abilene Reporter News

July 1, 2008

"Abilene Man Wants You to Know..."

www.reporternews.com/news/2008/jul/01/do-you-believe/

Darrin McBreen, 41, has created a popular YouTube video, featuring footage shot in Abilene, Texas examining "chemtrails," a term derived from the belief of some researchers that certain jet plane contrails dump "chemicals" on an unsuspecting populace below. The reasons given for such alleged activity vary. Some advocates link it to weather control experimentation, while other researchers tie in more dire effects, ranging from ill health to (at the extreme end) a program of mind control, echoing other historical examples of overt experimentation on mass human populations.

"The response has been incredible" he said.

"YHWH shall make the rain of thy land
POWDER AND DUST: from heaven shall it
come down upon thee, until thou be destroyed."

-Deuteronomy 28:24 (KJV)

"About 30,000 people have seen it in a week's time. ... I've received responses from all over the world." But his video, "**Danger In the Sky -- The Chemtrail Phenomenon**," has maintained a five-star rating on YouTube video & garnered more than 600 comments, features interviews with figures, such as Austin-based radio personality Alex Jones, speaking over footage of planes flying among familiar Abilene sights.

"CHEMTRAILS" are
NOT Water Vapor!

"Chemtrails" look like contrails initially but are much thicker, extend across the sky and are often laid down in varying patterns of Xs, tic-tac-toe grids, cross-hatched and parallel lines."

Such trails, according to a Frequently Asked Questions file on Rense's site, "*expand and drop feathers and mares' tails. In 30 minutes or less, they open into wispy formations which join together, forming a thick white veil or a 'fake cirrus-type cloud' that persists for HOURS.*"

A normal exhaust contrail "*is supposed to dissipate over 30 seconds to three minutes,*" McBreen said. Many researchers also report a sort of cross-hatching effect of interspersed contrails, which some take to be sky-based markers, and unusual behavior of the planes themselves, circling and looping to cover & re-cover an area in ways they find to be anomalous.

Like many, McBreen believes some chemtrail sightings can be tied to weather experimentation with side effects such as spikes in elements such as "*aluminum oxide and barium salt powders in drinking water supplies and in the air,*" he said. Some who have communicated with him because of the video have agreed, even going so far as to say they can "*taste the aluminum*" in their mouths from chemtrails sprayed over their region, he said. "*Some of the more hardcore researchers wonder if it isn't a type of population control, with the intent to wear down your immune system.*" he said. "*When I first heard that, I found that to be pretty extreme. But the United States has a long history of chemical and biological testing on its own personnel.*"

McBreen mentioned a 1994 "**Rockefeller Report**," often quoted on conspiracy and chemtrail Web sites, detailing alleged experiments performed on U.S. soldiers. The report, "**Is Military Research Hazardous to Veterans' Health? Lessons Spanning Half a Century**," indicates it was prepared for the U.S. Senate's Committee on Veterans' Affairs in December 1994. Among the report's conclusions are that "*for at least 50 years, (the Department of Defense) has intentionally exposed military personnel to potentially dangerous substances, often in SECRET.*"

PROJECT SHAD: AMERICAN SERVICEMEN USED AS GUINEA PIGS

www.infowars.com/project_shad_docs.html

"Project Shipboard Hazard and Defense":(SHAD), was a program started in the early 1960's, to learn the vulnerabilities of US warships, during chemical or biological warfare attacks. Under "Project SHAD" were 113 different "Operations" or tests. US Naval crews and Marine personnel were sprayed with various biological and chemical germ warfare agents, and simulants. Some ships, and Marine personnel were sprayed from overflying aircraft, while other tests on ships were being sprayed by aircraft carriers, which were upwind. While some high ranking personnel may have had knowledge of what was happening, most of the ships crews did not. Project "SHAD" (Hebrew for "demon") was controlled by The US Army Desert Test Center, later to be known as Dugway Proving Grounds, Utah. For over 35 years, The Department of Defense said, "*there was NO Project "SHAD"(another lie.)*"

Today the DoD admits that it tested the deadly nerve agent Sarin, known as VX, or biological toxins on American Servicemen, but said the information was "classified." Lately the DoD agreed to declassify all of the 113 "Operations" and inform the Department of Veterans Affairs (VA) of the findings. Presently, *only 12 of the 113 have been declassified, although the information released is very limited.*

Steve Robinson, executive director of the National Gulf War Resources Center, said: "These veterans could be dying at a rate three times greater than the general population from diseases that could be related to their military service...We have a moral responsibility to set the record straight and that seems to be a problem for both the leaders in the Department of Defense, and the entrenched bureaucrats of the Department of Veterans Affairs."

"Military men are just dumb stupid animals to be used as pawns in foreign policy."
- Henry Kissinger, from "Kiss the Boys Goodbye: How the United States Betrayed Its Own POW's in Vietnam" by Monika Jensen-Stevenson & William Stevenson, 1999

Requests for a comment from Dyess Air Force Base on Tuesday were met with referrals to the Air Force's official position on the phenomenon. McBreen said that while chemtrail research is thriving on the Internet, (visit the website: www.carnicom.com) it is

important for people to understand that the evidence is "not limited to photos and videos posted on the Web." There are military reports, government studies, U.S. patents and U.S. legislation that back up claims by researchers" he said. "**H.R. 2977: The Space Preservation Act of 2001 mentions chemtrails by name**, for example." In the Act, which seeks to "*preserve the cooperative, peaceful uses of space for the benefit of all humankind by permanently prohibiting the basing of weapons in space by the United States,*" chemtrails are described, along with lasers, plasma, electromagnetic, sonic, ultrasonic weapons, and others as "*exotic weapons systems.*"

Mainstream media reports are included in McBreen's video, most notably television news reports from KSLA News in Louisiana (which McBreen said "confirms barium in Chemtrails") and a "*report from NBC News 4 in Los Angeles where residents reported getting ill from chem-trail activity,*" he said. McBreen said he would simply like to see more open debate on this.

"Not every contrail you see that stays up there might be a chemtrail," he said. "*But we do know that there are weather modification programs. We do know that they are cloud seeding. And we do know that they have experimented on their own people in the past.*" www.reporternews.com/news/2008/jul/01/do-you-believe/

KSLA News 12 - SHREVEPORT, LA
<http://www.youtube.com/watch?v=okB-489I6MI>
CHEMTRAILS: Is the U.S. Gov't. Secretly Testing on Americans 'Again'?

Could a strange substance found by an Ark-La-Tex man be part of secret government testing program? That's the question at the heart of a phenomenon called "Chemtrails." In a KSLA News 12 investigation, Reporter Jeff Ferrell shows us the results of testing we had done about what's in our skies.

"It seemed like some mornings it was just criss-crossing the whole sky. It was just like a giant checkerboard," described Bill Nichols. He snapped several photos of the strange clouds from his home in Stamps, in southwest Arkansas. Nichols said these unusual clouds begin as normal contrails from a jet engine. But unlike normal contrails, these do 'not' fade away.

Soon after a recent episode he saw particles in the air. "We'd see it drop to the ground in a haze," added Nichols. He then noticed the material collecting on the ground...KSLA News 12 had the sample tested at a lab. The results: A high level of barium, 6.8 parts per million, (ppm). That's more than three times the toxic level set by the Environmental Protection Agency, or EPA.

Armed with these lab results about the high levels of barium found in our sample, we decided to contact the Louisiana Department of Environmental Quality. They told us that, 'yes,' these levels are very unusual. But at the same time they added the caveat that proving the source is a whole 'nother matter.

We discovered during our investigation that Barium is a hallmark of other chemtrail testing. This phenomenon even attracted the attention of a Los Angeles network affiliate, which aired a report entitled, "Toxic Sky?"

There's already no shortage of unclassified weather modification programs by the government. But those who fear chemtrails could be

secret biological and chemical testing on the public point to the 1977 U.S. Senate hearings which confirmed 239 populated areas had been contaminated with biological agents between 1949 and 1969... But could secret testing be underway yet again?

"I'd rather it be something inert and something that's not causing any damage, but I'd like to know what it is!" concluded Nichols.

Canadians Petition Parliament

Canadians were the first to complain about chemtrails to their federal government. On Nov. 18, 1999, NDP Defense critic Gordon Earl petitioned Parliament on behalf of 550 residents of Espanola, Ontario to "repeal any law that would permit the dispersal of military chaff or of any cloud-seeding substance whatsoever by domestic or foreign military aircraft without the informed consent of the citizens of Canada thus affected."

According to CBC Newsworld (Aug 29, 1999), "Many in the community have reported respiratory problems and strange aches and pains. Town council heard that some believe military jets are dropping material over the town as part of a weather experiment" - after laboratory tests confirmed the presence of aluminum in rainwater falling through chemtrails over Espanola five-times higher than provincial health safety limits. The Ministry of Defense eventually replied, "It's not us."

GERMAN COLLUSION

Germany became the first country to admit to the clandestine use of chemtrail operations.

The TV news report stated that *"the military planes of the German Federal Army are manipulating our climate; this is what the weather researchers are presuming and their suspicions are confirmed..."*

The fragile balance of nature is adversely affected by this dangerous spray program!

CHEMTRAILS ARE PATENTED!

A scientist now confirms that the United States military funded research which led to a patent suspected of making so-called "chemtrails" in our skies. Jeff Farrell of KSLA TV-12 has updated his original story with this, "I learned about U.S. Patent #: 5,003,186, titled 'Stratospheric Welsbach Seeding for Reduction of Global Warming.'" better known by chemtrail researchers as **"The Welsbach Patent."**

The patent describes putting metallic particles like aluminum and barium into jet fuel. Then, exhaust from the jet engine seeds the stratosphere. In turn, those small metallic particles serve a dual purpose by: 1) reflecting incoming light back into space and 2.) helping convert the warmth below into infra-red waves, allowing them to escape from the earth's atmosphere. Q: Could "global warming" be a result of these top secret weather modifying operations?

THE IDAHO OBSERVER

According to a report published 8/28/06 in The Idaho Observer, recent lab reports found the following in samples of chemtrail fall-out: bacteria including: anthrax and pneumonia, 9 chemicals including acetylcholine chloride, 26 heavy metals including arsenic, lead, barium, mercury and uranium, 4 molds and fungi, 7 viruses, 2 cancers, 2 vaccines and 2 sedatives.

"We know that America's military-industrial complex has been spewing various forms of barium into

our atmosphere for years. The University of Alaska has propelled barium into space in order to study the earth's magnetic field lines. The military used barium salts over enemy territory in Libya, Panama and Iraq, reportedly to make the population weak and sick. A recent report from Wright-Patterson Air Force Base con-firms that the Air Force has been spraying barium titanate (radioactive) salts across the United States to facilitate advanced radar studies.

Chemical handbooks state that barium is highly toxic to human beings. The officially "safe" levels of barium in the environment are quite low, on the order of 1-2 parts per million. The Agency for Toxic Substances and Disease Registry warns that humans who ingest high levels of barium can develop problems with the heart, stomach, liver, kidneys, spleen and other organs." - Amy Worthington

Welcome to a brave new world of toxic barium skies, weather control, mind control and population control through the use of chemtrails modulated with ELF-electromagnetic frequencies generated by HAARP. Our health is under attack as evidenced by the skyrocketing rates of chemtrail-induced lung cancer, asthma and pulmonary/respiratory problems. Our natural environment and planetary weather systems are under attack resulting in freak lightning strikes, bizarre weather, 20% less sunlight reaching the Earth' surface, the alarming, nearly complete collapse in certain areas of the west coast marine ecosystem and the creation of some of the largest tornadoes and hurricanes on record.

Our skies are increasingly hazed-over with fake barium/aluminum particulate, ethylene dibromide chemtrail clouds. Whether in the atmosphere or in the ocean, this added particulate matter is a hazard to the health of every living thing on this planet. There is a main-stream media **black-out** on this subject, so the only way to get the word out is by word of mouth! The final judgments against violating YHWH's Covenant have begun! *For more information,*

"only a remnant will be saved."
